

Cancer Prevention and Treatment Fund

Making a
Measurable and Meaningful
Difference in 2023

*Designated as one of America's Best Charities by Independent Charities of America,
98 cents of every dollar will pay for programs, much higher than most charities!*

What We Do

- ▶ We are fighting for laws to improve research on which cancer treatments work best for you.

- ▶ We protect 60 million families by fighting big oil companies, resulting in removal of cancer-causing BPA, phthalates, and other chemicals from mattresses, children's toys, baby bottles, computers, artificial turf, and playgrounds.

- ▶ We provide free help to tens of thousands of individual patients and their families through our hotline and personalized assistance.

- ▶ We are featured in the *The New York Times*, *The Washington Post*, *Wall Street Journal*, *Bloomberg News*, *LA Times*, *Politico* and on *NPR* and major TV news programs on medical breakthroughs and helping correct medical misinformation. This helps us inform millions of Americans about important medical issues that affect their lives.

- ▶ We're here for you. We're here in person, in a real office with experts on staff who can help you, and we also provide help on the phone, on our website, and through email. Contact us at info@stopcancerfund.org.

How We Help

"My mother died from the side effects of her cancer treatment. Years later, the medication was taken off the market. We all want new medical treatments to be available as soon as possible, but only after being proven safe and effective. Can you help me figure out which medications are proven to safely help patients live longer?"

"My husband was diagnosed with stage 4 prostate cancer. His medical treatment was not working as well as we hoped so we went to Mexico to get an experimental treatment. After spending thousands of dollars on their tests, should he get treated there? What can you tell us about them, and about the new drug his U.S. doctor is recommending?"

These are the kind of heartbreaking requests we get through our hotline. We assist each person individually, helping them to choose the best treatment options or to notify their health providers, and the media about harmful medical products.

New York Times best-selling author Harriet Lerner said it best:

"When I was diagnosed, the Cancer Prevention and Treatment Fund was like a life preserver that I could grab on to. It's a nonprofit that wasn't selling me anything and that presented objective facts and up-to-date research without pressuring me to do one thing or another. The written materials were easy to read and understand—and free!"

"I also had the chance to talk to a great person on the phone (also free) who didn't overload the circuits by giving me too much information. She was obviously up on the latest research findings, and I learned new facts that were pivotal in my decision making."

*"Thanks to your **Cancer Prevention and Treatment Fund**, I'm doing great! I'm so grateful."*

We can't be bought.

We accept NO funding from drug companies or other sources that could influence our work or compromise our integrity.

Gifts can be made easily online, in the mail, through CFC, or give us a call and we can assist you over the phone.

Help us make a measurable difference!

Your donation makes a difference by ensuring that we're here for you and your loved ones. Donations pay for essential services, not huge CEO salaries.

Supports our online health hotline for 6 patients or family members

\$125

Helps 100 patients by providing free medical information

\$260

Helps us fight for laws to reduce the cost of urgently needed medications

\$1,000

Supports internships or fellowships in your name or the name of a loved one

\$5,000

We have a small staff and our budget is a small fraction of many charities'. How do we accomplish so much?

- **Our exceptional staff provide free help to millions of patients and consumers.** Our assistance is always free, on our website (www.stopcancerfund.org) and in our personalized responses to people contacting us daily on our online health hotline (info@stopcancerfund.org).
- **We train thousands of health professionals** through free courses and training. We don't accept money from companies making medical products—that's why we are such an important source of objective information for doctors and nurses.
- **We educate** current and future leaders on complicated medical issues. We work with nationally respected researchers to explain their research findings to those who need them most – patients, family members, policy makers, and health professionals. And our internships and fellowships train tomorrow's leaders.
- **We leverage our power** to strengthen the voices of patients and consumers. We testify and provide expert advice to the FDA, EPA, CDC, VA, the U.S. Congress, and state and city governments. We are a leader in the Patient, Consumer, and Public Health Coalition, which represents more than 7 million people who want to urge policy makers to ensure the safety and effectiveness of medical treatments for all Americans.
- **We're in the news**, interviewed on all major media, reaching opinion leaders and Americans in all walks of life. Reporters contact us regularly, asking us to explain the latest research on medical issues that affect all our lives. This enables us to reach most Americans, so they can keep their loved ones healthy.

A few of our goals :

- ♦ **Prevent pharmaceutical companies from charging outrageous prices to U.S. patients!** Why should Americans pay more than any other country for exactly the same medications for cancer or any other treatments?
- ♦ **Ensure that medications taken by people over 55 are tested on people over 55.** Most medications are tested on younger patients, who metabolize drugs differently. Testing patients over 55 will improve treatments for more than 70 million Americans.
- ♦ **Improve treatments for all types of cancer.** The latest research shows that too many Americans are spending their life savings on cancer treatments that are not more effective for them than less expensive FDA-approved treatments. For example, many drugs for cancer did not evaluate whether they help patients live longer. We are making sure that patients and physicians have that crucial information.

Help us achieve our goals

by donating online, in the mail, through CFC #11967, or call us and we can assist you over the phone.
